

Team X Architecture: Top Layers

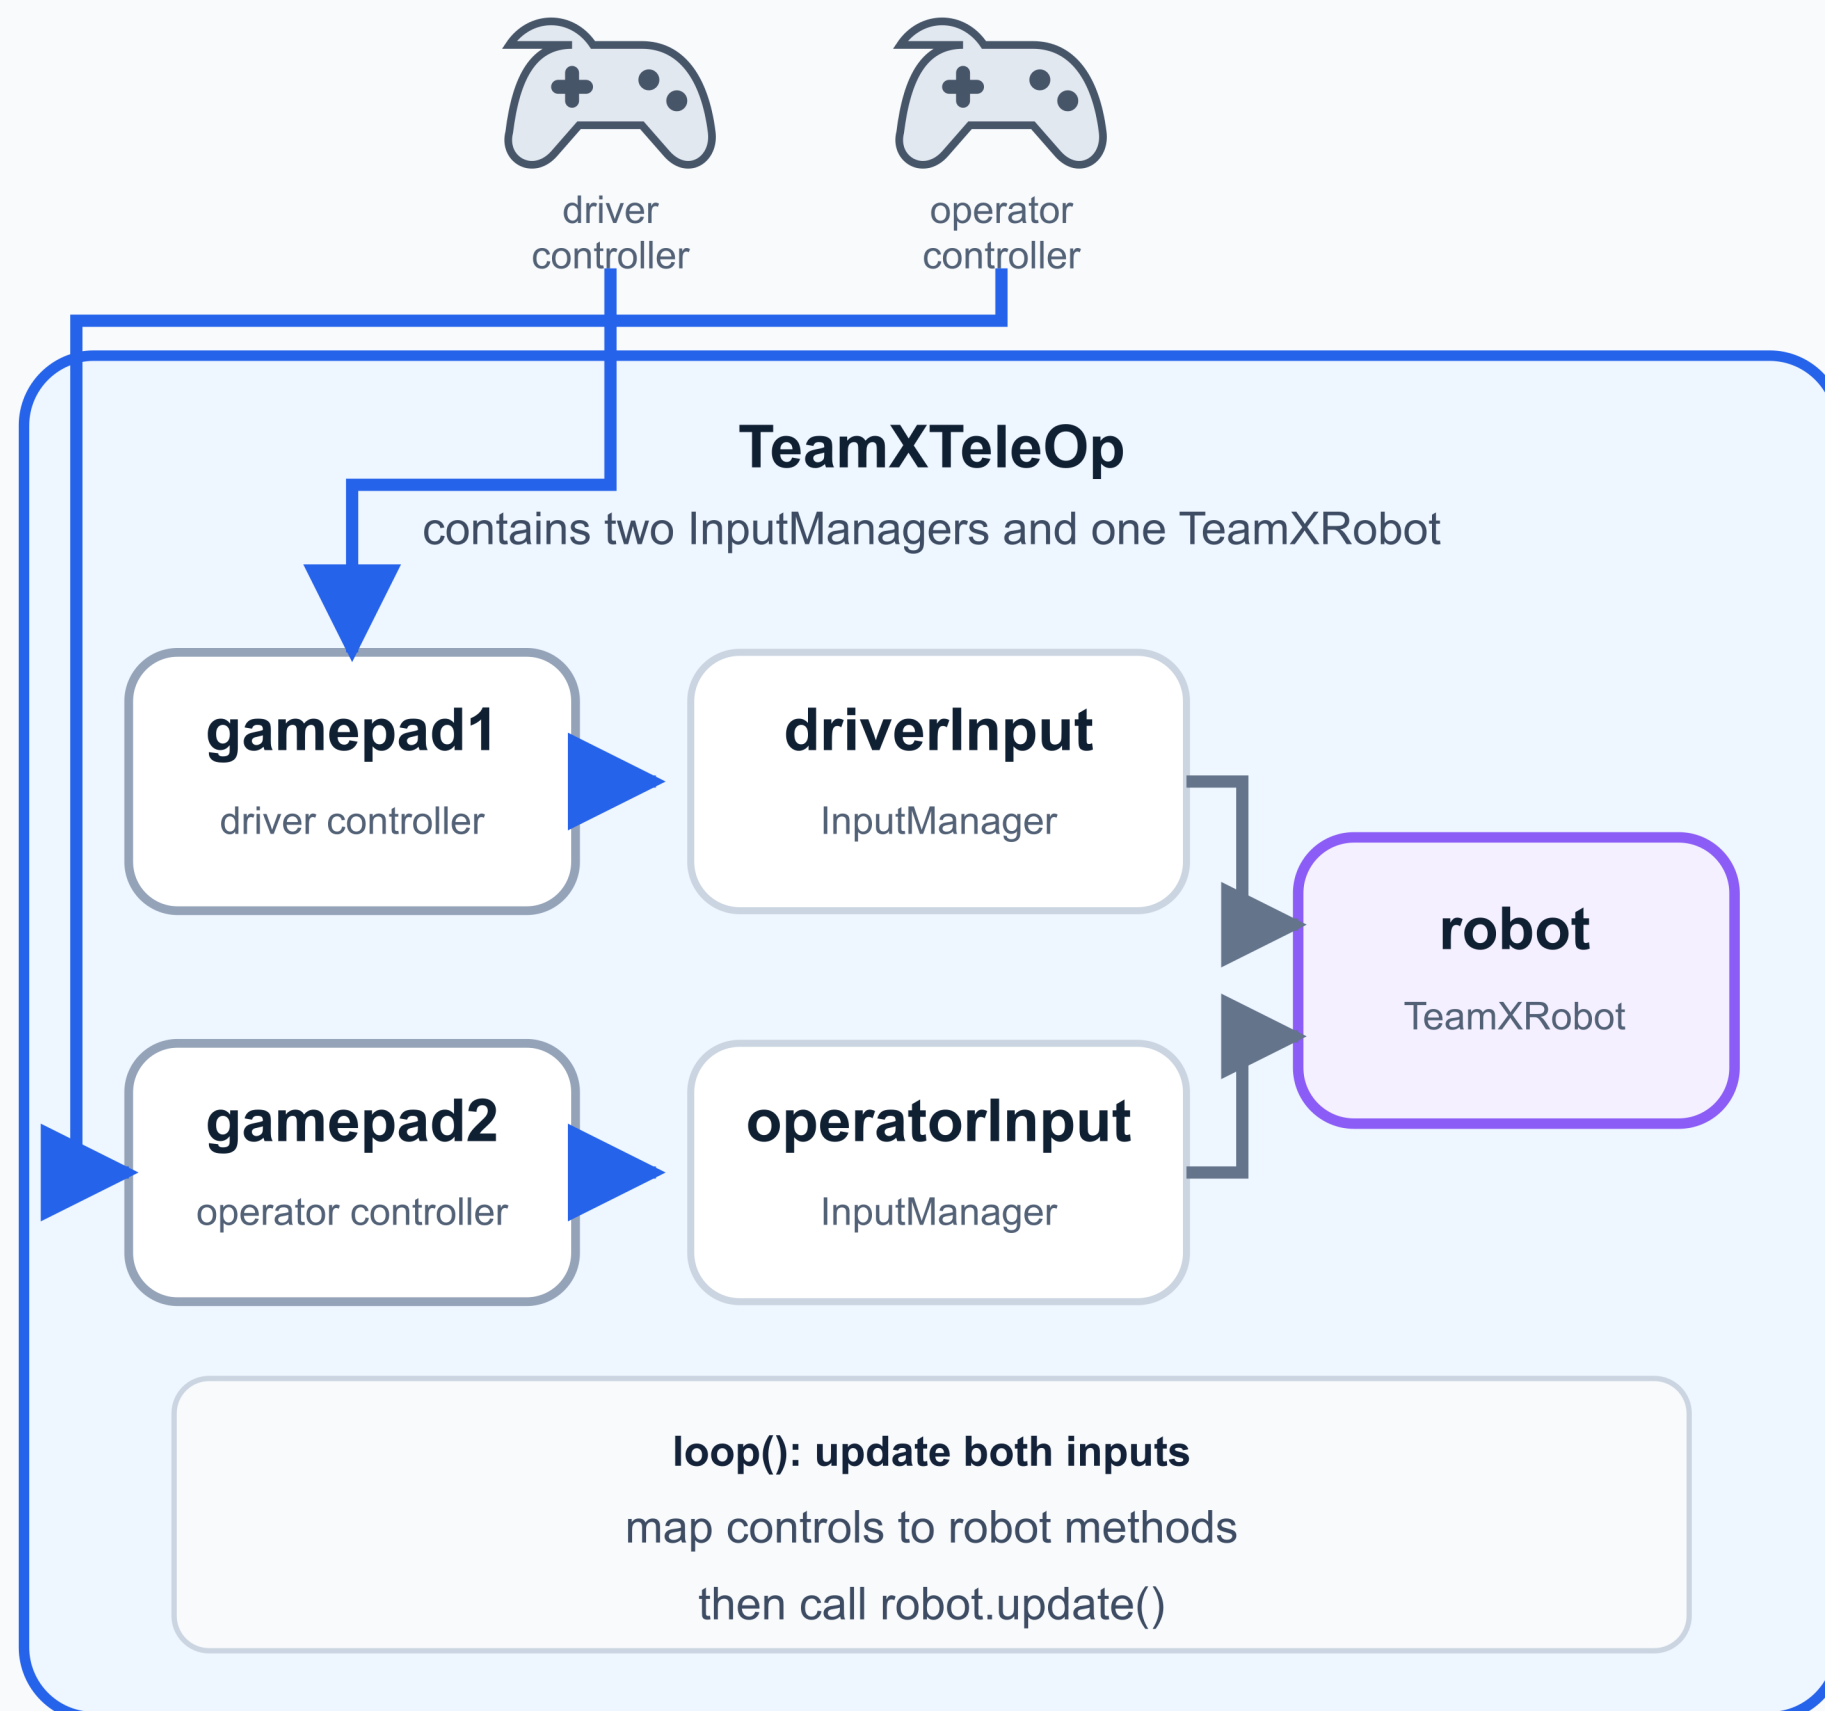

This page stops at TeamXRobot. Subsystems, FSM states, and hardware are shown on later pages.

Composition: an object contains other objects and uses them to do part of its job.

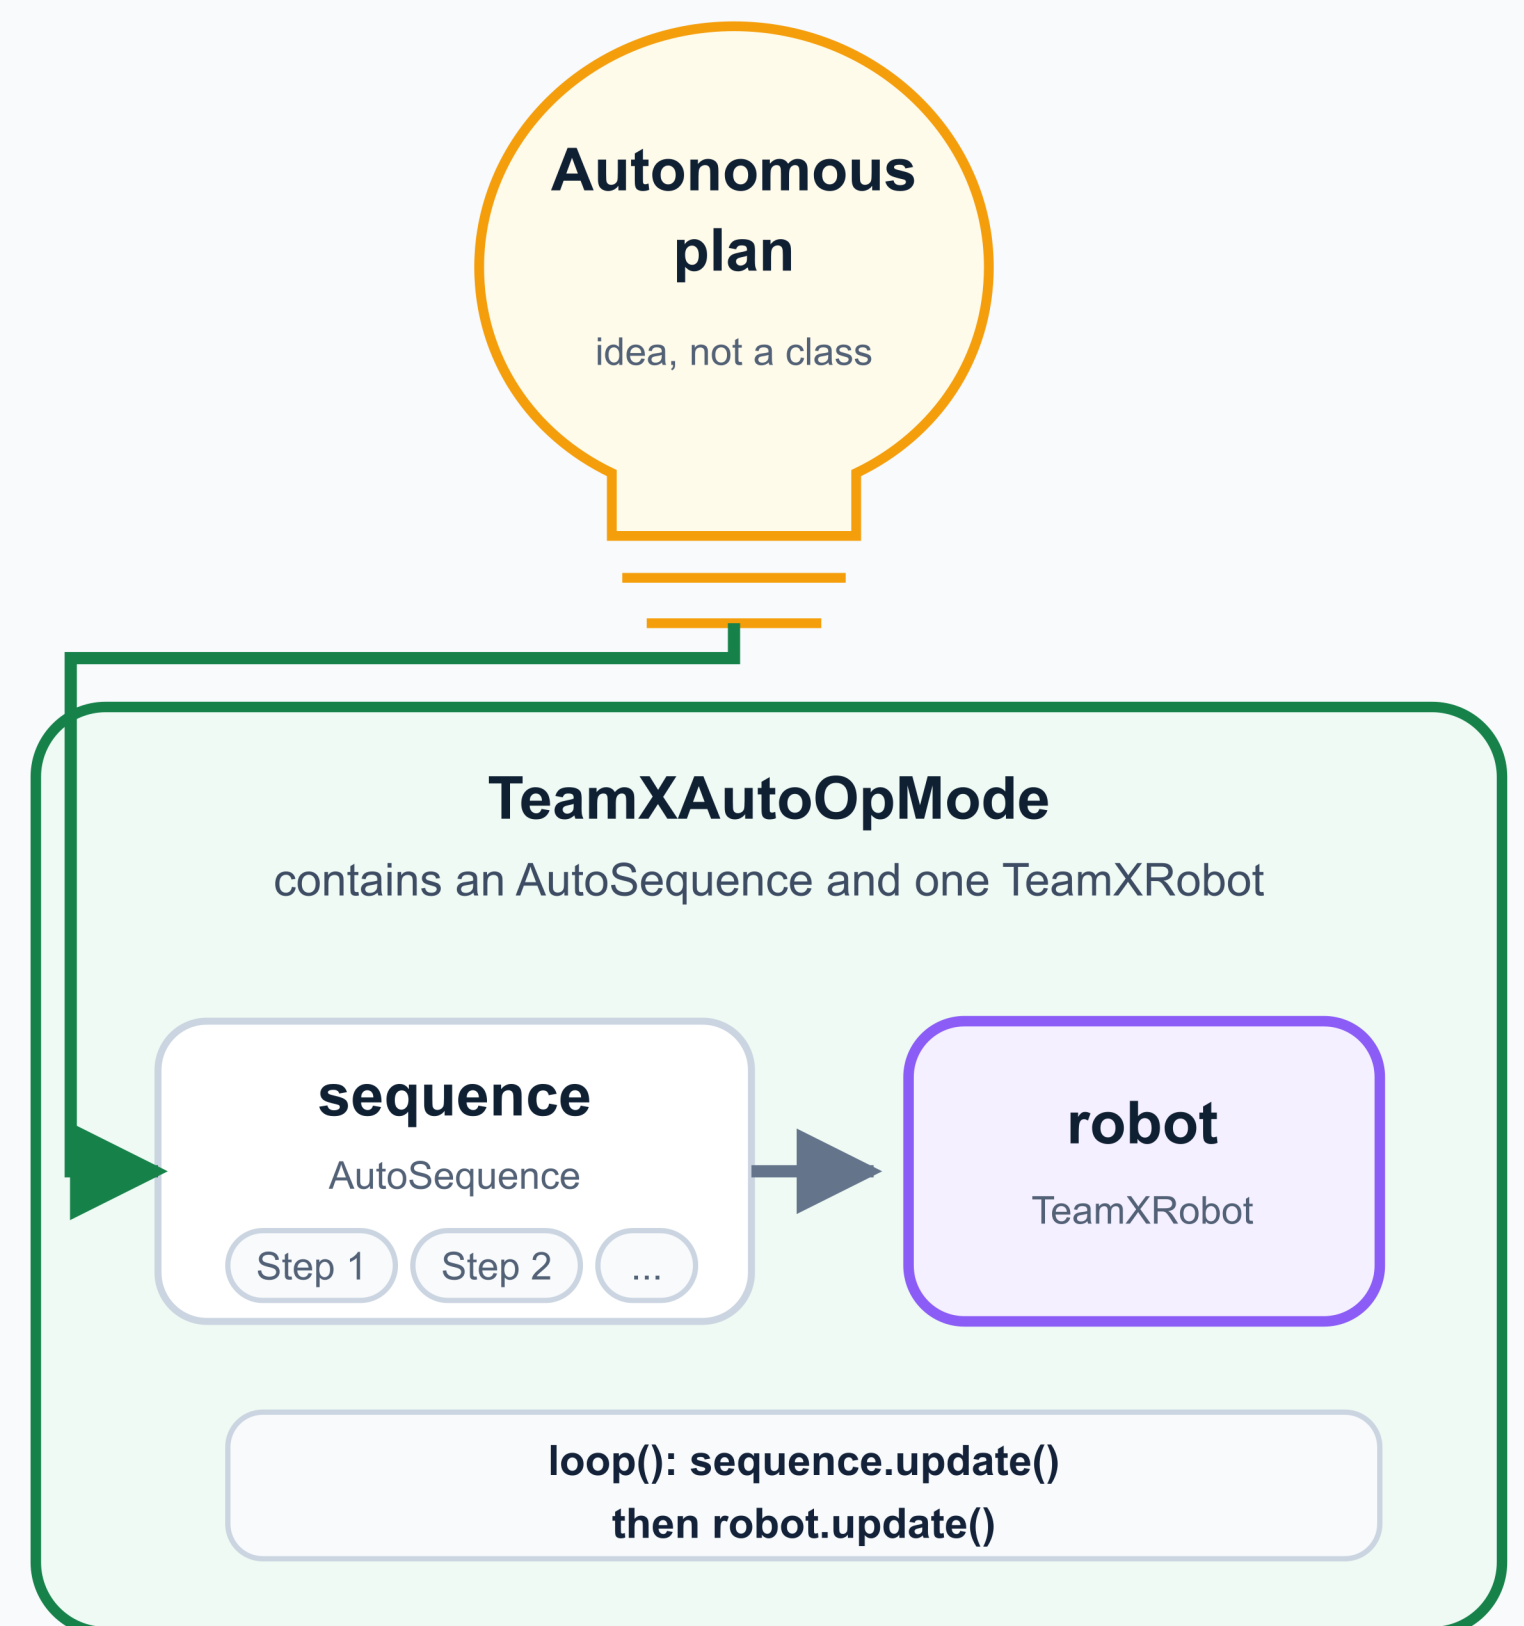

Containment boxes show ownership. Solid arrows show reads or method calls.

solid arrows = reads/calls

Team X TeleOp Path

Team X Autonomous Path

Both OpModes stop here by calling TeamXRobot public methods. TeamXRobot owns subsystems in the next diagram.
